

**CSE3501 INFORMATION SECURITY ANALYSIS AND AUDIT
EXERCISE – 12**

DATE: 22.10.2020

OPEN CYBER SECURITY QUESTIONS

Perform the following tasks:

1. Capture any Live Video Feed from any CCTV Footage. Describe your observations like place, time, what do you see etc.
2. Create a bogus/fake cloning of a popular website. Mimic a phishing attack on this cloned website. Explain each step in the process and show the screenshot. Show the stolen credentials of the victim and the email you sent to the victim.
3. Show the use of any two reconnaissance tool.

Note :

- You can choose any Tool for the tasks.
- Provide your description for each step in the task---why did you choose the tool, how efficient it is for the task, what are the limitations in it, what tricks you adapt to do the task
- Show the screen shot of each and every step.
